Map 6 - Industrial Sites Producing and Using Coal Tar and Related Tars in Ontario

ONTARIO MINISTRY OF THE ENVIRONMENT
WASTE DISPOSAL SITE INVENTORY

EXECUTIVE SUMMARY

This document contains an updated list, prepared by the Ministry of the Environment, of all known active and closed waste disposal sites in the Province as of October 31, 1990. The document is divided into an active site inventory, listing 1,358 sites; a closed site inventory, listing 2,334 sites. The closed municipal coal gasification plant site inventory, listing 41 sites; and the inventory of industrial sites producing and using coal tar and related tars in Ontario, listing 44 sites. For each site, information is provided on waste types, site locations and, in the case of closed sites, the year of closure. The coal gasification plant site inventory, not included in the original inventory document published in July 1986, lists newly-identified sites where coal tar waste may be present. As with the original list published in 1986, and the updated inventory published in May, 1988, this updated publication is a working document subject to continual revisions and updating.

The gathering and assembling of information required for the inventory is a major part of the Ministry's long-term, comprehensive program to investigate and monitor waste disposal sites throughout the Province. The information sources include the Ministry's computerized data files on individual sites, file archives, and field inspections of the sites.

Many of the sites listed in this document were closed prior to the enactment of legislation in 1971 requiring the issuance of a Certificate of Approval for the operation of a waste disposal site. As a result, these older, closed, uncertified sites are not accompanied by the same level of information regarding such things as waste type and physical setting. Much additional work is required to ensure that essential and uniform information is available for all waste disposal sites in the Province.

As a means of developing an orderly approach to the investigation of all sites, an internal Ministry waste disposal site classification system has been developed. This classification system (detailed in Appendix A) identifies two basic types of sites:

1. sites deemed to have the potential to have an impact on human health ("Class A" sites) and;

2. sites deemed to have the potential to impact the environment in general ("Class B" sites).

Further subdivisions of each class (A1, A2...; B1, B2...) reflect site-specific waste characteristics as detailed in Appendix A.

The classification system serves only to group the sites, based on available information, into classes to ensure the systematic Ministry investigation of all sites. It does not intend, nor can it be assumed, to classify the sites according to actual impacts or hazards.

The active and closed waste disposal site inventories are continually being updated and verified. In many cases certain pieces of information, denoted by "NAV" in the listings, were not available at the time of this publication. Where information is missing, as for example lot and concession numbers or a municipality name, every attempt will be made to incorporate this data into future inventory listings. Much of northern Ontario has not been organized into legal townships or other municipal entities. In these cases, the municipality of the site has been indicated by naming a geographic feature of local significance such as a lake or river.

The approximate locations of all active and closed waste disposal sites are shown on maps located at the back of the report. A separate map shows the approximate locations of former (municipal) coal gasification plant sites. Also included is a map showing the approximate locations of industrial sites producing and using coal tar and related tars in Ontario. The purpose of these maps is to provide general locations of waste disposal sites throughout southern and northern Ontario. If more accurate site locations are necessary, this information is available from local Ministry district or regional offices shown on the map in Appendix B.

Because of the small scale of the maps, it has not been possible to avoid congested areas where many sites are located in a small area. These areas usually occur in cities.

ACTIVE WASTE DISPOSAL SITE INVENTORY

ACTIVE WASTE DISPOSAL SITE INVENTORY
LEGEND

Map ID NO

The identification number of a site shown on a location map in the back of the report. The sites in each "County" are numbered from "1" to whatever number of sites there are in that County. Therefore reference to a site on the map must name the "county" name and the "map id no", e.g. "Oxford County, site number 5".

SITE NO.

All sites that are approved for operation in the Province by the Ministry are assigned a Certificate of Approval number. The site number is the same as the Certificate of Approval number.

COUNTY

Name of the County, Regional Municipality, or District where the site is located.

MUNICIPALITY

Name of the city, town, village or other incorporated municipality where the site is located.

LOT NO.

The number or name of the lot in the concession where the site is located.

PT	=	part
SW1/2	=	southwestern half of....
LT	=	lot
PT14 N2/2	=	part 14 north half (north half of part lot 14), etc.
NAV	=	not available
UNSURVE	=	unsurveyed
NAME	=	A, A-B, Gore A, Range B & C, etc.
DIV	=	Division

CONCESS

The number or name of the concession where the site is located. The following have been abbreviated:

EMR	=	East Mitchell Road
SWR	=	South West Range, etc.
UNSURVE	=	unsurveyed
NAV	=	not available
SEC	=	Section

NTS

The National Topographic System map number on which the site is located.

UTM COORDINATES

ZONE EAST NORTH

The Universal Transverse Mercaptor Grid System.

D

Domestic waste

C

Commercial waste

O

Other waste

H

Hazardous waste

L

Liquid waste

NH

Non-hazardous solid industrial waste

SS

Sewage sludge

Numbers under waste types are percentages of that particular waste received by the site.

ST

Site Status:

1 = active site; a site that is approved to receive and is receiving waste

3 = inactive site; a site that is approved to receive but at this time does not receive any waste

CL

Site classification indicates the potential health and/or environmental impact of the site according to the system indicated in Appendix A.

CLOSED WASTE DISPOSAL SITE INVENTORY

CLOSED WASTE DISPOSAL SITE INVENTORY
LEGEND

MAP ID NO

The identification number of a site shown on a location map in the back of the report. The sites in each "County" are numbered from "1" to whatever number of sites there are in that County. Therefore reference to a site on the map must name the "County" name and the "map id no", e.g. "Oxford County, site number 5".

SITE NO.

Site identification number.

COUNTY

Name of the County, Regional Municipality, or District where the site is located.

MUNICIPALITY

Name of the city, town, village or other incorporated municipality where the site is located.

LOT NO.

The number or name of the lot in the concession where the site is located.

PT	=	part
SW1/2	=	southwestern half of....
LT	=	lot
PT14 N2/2	=	part 14 north half (north half of part lot 14), etc.
NAV	=	not available
UNSURVE	=	unsurveyed
NAME	=	A, A-B, Gore A, Range B & C, etc.
DIV	=	Division

CONCESS

The number or name of the concession where the site is located. The following have been abbreviated:

EMR	=	East Mitchell Road
SWR	=	South West range, etc.
NAV	=	not available
UNSURVE	=	unsurveyed
SECT	=	Section

NTS

The National Topographic System map number on which the site is located.

UTM COORDINATES

ZONE EAST NORTH

The Universal Transverse Mercator Grid System.

DATE CLOSED (YYYYMMDDorYYYY)

The date the site was closed and/or stopped receiving waste.

CL

Site classification indicates the potential health and/or environmental impact of the site according to the system indicated in Appendix A.

A:FICZERE,0503TABLE

APPENDIX A
WASTE DISPOSAL SITE CLASSIFICATION SYSTEM

Appendix A

Waste Disposal Site Classification System

The classification system is based on the following assumptions:

1. Waste at all disposal sites have the potential to produce leachate; leachate can contaminate ground water, streams and lakes. Methane gas can also be produced and can pose an explosion hazard. However, because of natural dilution or the natural attenuation capacity of soils, or due to engineering facilities built into landfills, impacts on humans or the environment may not be detectable at a point of concern.

2. In general, industrial liquid/hazardous waste, because of the highly toxic nature of some of these wastes, are of greater concern than domestic/municipal wastes.

3. For domestic/municipal wastes, the date of closure of the site is important since the rate of leachate and gas production declines with the age of the landfill. For industrial liquid/hazardous waste, because of the high initial concentrations and often low solubilities, leachate and gas production can be maintained at levels of concern for a longer period of time.

4. Waste disposal sites in urban areas are of concern because of the high development density often found around the sites and, if this development doesn't exist, the high potential for future urban encroachment onto the adjacent lands. Waste disposal sites in rural areas are of concern due to the potential for contamination of domestic water supplies.

5. If a domestic/municipal landfill has been closed for at least ten years, and there have been no methane-related concerns, then it is assumed that, unless the site's environment is significantly changed by development, these concerns will not arise in the future.

6. If the material beneath and surrounding a landfill is highly permeable, ground water contamination is of concern; if the mamterial below and surrounding the site is fairly impermeable, surface water contamination is of concern.

All known active or closed waste disposal sites in Ontario have been classified using the same basic criteria in which the waste type and site location determine the classification of a site. "Class A" sites are those that are deemed to have the potential to impact human health because of the proximity to human development; "Class B" sites are those that are deemed to have the potential to impact mainly the environment.

In order for a waste site to be classified, its location must be known. The precise locations of some very old sites are approximate. Once the location of the site is known, it can be determined whether any of the A criteria (accompanying the classification table) apply. From this it can be determined whether the site is a "Class A" or a "Class B" site.

(TO ACCOMPANY TABLES I & II)

"CLASS A" CRITERIA - HAZARD TO HUMANS

THESE CRITERIA, SINGLY OR IN COMBINATION WITH OTHERS, INDICATE THE HIGHEST HAZARD TO HUMANS; FURTHER INVESTIGATIONS MAY BE WARRANTED TO DEFINE PRECISELY THE HAZARD(S) AND TO DETERMINE ACTIONS NECESSARY IN THE FUTURE.

- EXISTING DWELLING/STRUCTURE (WITH OR WITHOUT WELL) ON SITE
- PRIVATE WELL 1000 m FROM SITE
- MUNICIPAL WELL 1000 m FROM SITE
- PERENNIAL STREAM ON SITE OR WITHIN 1000 m FROM SITE AND THERE IS KNOWN DOMESTIC CONSUMPTIVE OR IN-STREAM USE OF STREAM WATER WITHIN 5 km DOWNSTREAM
- LIKELY FUTURE DEVELOPMENT OF LAND IN URBAN AREA OR IN DEVELOPED RURAL AREA
- SIGNIFICANT AQUIFER AT SURFACE OR WITHIN 10 m OF SURFACE AND GROUND WATER MOVEMENT IS DOWNWARD
- PAST PROBLEMS AT SITE

THE FOLLOWING SUPPLEMENT THE FOREGOING CRITERIA AND SHOULD BE NOTED FOR EACH SITE. THEY SHOULD NOT BE USED BY THEMSELVES TO CLASSIFY A SITE AS A "CLASS A" SITE.

- EASY PUBLIC ACCESS TO WASTE OR SITE
- EXISTING MONITORING FOR METHANE GAS, SURFACE OR GROUND WATER
- LANDFILL AREA 1 ha

"CLASS B" CRITERIA - HAZARD TO ENVIRONMENT

A SITE THAT DOES NOT SATISFY ANY OF THE "CLASS A" SITE CRITERIA IS AUTOMATICALLY A "CLASS B" SITE. THIS CLASSIFICATION INDICATES GENERALLY A LOW POTENTIAL FOR IMPACT ON HUMANS AND FURTHER INVESTIGATIONS REGARDING THESE IMPACTS ARE NOT AS URGENT AT THESE SITES AS AT THE "A" CATEGORY SITES. HOWEVER, THE HAZARD TO THE ENVIRNONMENT MAY STILL BE HIGH AND FURTHER INVESTIGATIONS MAY BE NECESSARY TO DEFINE THIS HAZARD.

TABLE I: ACTIVE WASTE DISPOSAL SITE CLASSIFICATION

	INDUSTRIAL LIQUID/ HAZARDOUS WASTES		MUNICIPAL/DOMESTIC WASTES
